

# BETTERPREPSUCCESS

## THINGS TO CONSIDER

**WHICH SUBJECTS TO TAKE?** Most in-person and remote live students take all four subjects, but students can choose which subjects they want to take.

**NO HOMEWORK:** Everything is done in class. Students are trained on how to prepare outside of class and how to be better test performers.

**MAKE-UP CLASSES:** Students are welcome to attend another class in-person to make up a missed class. When unable to attend in-person, students can join remote live. Students will also have access to make-up videos. Jason understands students are very busy, so the students have plenty of options to get ALL the information in some format.

## REMOTE LIVE OPTIONS AVAILABLE!

Jason Franklin teaches all his in-person classes with a camera in front of him so students can participate remote live; therefore, the remote live schedules are the same as the in-person class schedules.

When registering, although a student chooses a particular session to attend remote live, they are allowed to attend any of the remote live sessions to work around their busy schedules.

Jason has a very visual teaching style, utilizing PowerPoint presentations throughout his entire lessons, so remote live students can watch a split screen - Jason presenting and see Jason's computer screen at the same time - thanks to Zoom technology.

*"My composite improved from 25 to 30. My reading score jumped from a 23 to a 32, English 24 to 30, and science 24 to 30. Thanks for giving me the opportunity to improve this much!" – Allison (remote live student)*

## STUDENT PORTAL ADVANTAGE!

All of Jason's in-person and remote live students have access to our BPS student portal that includes helpful tools that students can use even when their class is officially over. The portal includes the following three effective components.

**EXTRA MATH TRAINING:** Most students lost a lot of quality high school math instruction due to COVID lockdowns, remote learning, hybrid models, and other restrictions. Jason created a special math training plan with over 20 videos to help students catch-up. All in-person and remote live students will have access to this plan.

**MAKE-UP VIDEOS:** This allows students to catch up if they missed a class or review what was taught once the class is over, even if they are taking the test months later.

**EXTRA PRACTICE:** The class trains students how to prepare on their own. Students will have access to over 40 practice tests and Jason's customized answer explanations. Again, there is no homework. The extra practice is simply an opportunity for students to work on their own. The more a student practices – using the techniques taught in the class – the better a student will do overall!
